

InterGate Policy Manager Suite

The InterGate Policy Manager Suite offers unequalled flexibility and extensibility for the enterprise to manage and control user Internet activity. The suite includes InterGate Policy Manager, InterGate Inspect, InterGate Intercept and InterGate Intelligence. The deployment of InterGate Policy Manager Suite greatly increases productivity, enhances security, reduces legal liability and optimises the use of IT resources for any organization.

InterGate Policy Manager provides a comprehensive platform for seamless integration with InterGate Inspect, InterGate Intercept and InterGate Intelligence.

InterGate Inspect is a database of over 11 million sites covering 2 billion web pages and 40 well-organized categories which are updated on a daily basis.

InterGate Intercept has the ability to block or allow users from accessing applications such as Instant Messaging (IM) applications such as AIM (AOL Instant Messenger), ICQ, Yahoo Messenger, MSN Messenger; Peer-to-Peer applications like eDonkey, eMule, Kademlia, BitTorrent, Gnutella (Morpheus, LimeWire), Kazaa and the Internet telephony application, Skype.

InterGate Intelligence presents fully drillable reports showing both summary and detailed information regarding the use of Internet resources.

Help and Documentation

A copy of the InterGate User Guide and other manuals can be downloaded in PDF format from:

http://www.vicomsoft.co.uk/download/igpm_guides.php
